

TechAbility Conference 2018

16 October 2018 | 10am – 4pm

TechAbility presents a conference for all who wish to improve and expand Assistive Technology provision for their learners. This one-day conference is focussed on increasing skills and knowledge across the FE sector. Designed to enable leaders, managers and practitioners to choose the right solutions for learners and provide an environment which supports AT to deliver education and training outcomes.

Attendees can select workshops to attend that are delivered by assistive technology experts.

Assistive technology hardware and software relevant to the FE and training sector will be showcased.

There will be networking opportunities where delegates can share good practice and knowledge with peers.

Who should attend?

- Specialist college leaders and managers
- Leaders of specialist training provision
- Assistive technology practitioners
- Tutors and learning support

Key Themes

Does your IT support Assistive Technology?

Assessing learners with complex needs

Virtual and Mixed reality as assistive technologies

Using voice control for access and learning

Creating learning opportunities using mainstream tools

The impact AT can have on learning – case studies

Try for yourself – experience eye-gaze, VR, switching and voice control technology.
